Professional Summary

Results-driven Senior QA Automation Engineer with 12 years of experience in software testing, quality assurance, and automation framework development. Proven expertise in designing and implementing scalable UI and API automation solutions using Playwright, Selenium WebDriver, Java, JavaScript, and Python. Strong experience in test strategy, framework design, CI/CD integration, Agile delivery, and defect prevention, with a track record of improving test coverage, reducing regression effort, and enhancing product quality. Adept at collaborating with cross-functional teams, mentoring engineers, and delivering reliable, high-quality software solutions in fast-paced enterprise environments.

Technical Skills

Automation Testing: Playwright, Selenium WebDriver, TestNG, Junit, Cucumber BDD, Page Object Model (POM)

Programming Languages: Java, JavaScript, Python, PowerShell, PHP

API Testing: Postman, REST Assured, API Automation Testing

DevOps & CI/CD: Jenkins, Azure DevOps, Git, GitHub Actions

Test Management: JIRA, Agile Scrum, Defect management

Databases: MySQL, SQL

Emerging Skills: AI Agent Testing, Prompt Validation, End to End AI Automation using Playwright MCP Server

Professional Experience

Senior Specialist QA Automation Engineer, LTIMindtree (09/2022 – Present) | Coimbatore, India

- - Designed and implemented enterprise-level automation frameworks using Playwright and JavaScript.
- Developed scalable Page Object Model (POM) frameworks supporting multiple applications.
- Automate UI, API and regression test suits.
- Integrate automation execution into Azure DevOps CI/CD pipelines.
- Perform API validation using Postman and Rest Assured.
- Conducted cross-browser and end-to-end testing.
- Collaborated with developers, product owner and business stakeholder in Agile environments.
- Mentored QA team members on automation best practices.

Key Achievements

- Increased automation coverage by 40-60%.
- Reduced regression execution effort by 60-70%.
- Improve release quality through continuous automated validation.
- Developed reusable framework components used across multiple environments (Dev, QA, Stage, pre-prod)

Specialist Automation Engineer, HCL Technologies (09/2016 – 09/2022) | Madurai, India

- Developed Selenium WebDriver automation framework using Java.
- Automated functional, regression and smoke test scenarios.
- Participant in sprint planning, grooming and retrospective sessions.
- Managed defects using JIRA.
- Mentored junior automation engineers.

Achievement

- Automated 100+ manual test cases, reducing manual effort significantly.

Programmer, The Chennai Silks Corp Office (11/2013 – 07/2016) | Tirupur, India

- Develop web applications using PHP and CodeIgniter.
- Designed database structures using MySQL.
- Built front-end applications using HTML, CSS, JavaScript, Ajax and jQuery.
- Performed functional and system testing.

Project Highlights

UI Automation Framework

Tools: Playwright, JavaScript, Azure DevOps

- Developed enterprise-grade automation framework from scratch.
- Automated 300+ regression scenarios.
- Enable nightly execution through CI/CD pipeline.
- Reduced manual testing effort by over 70%.

API Automation Framework

Tools: Playwright, JavaScript, Azure DevOps

- Developed reusable API testing framework.
- Integrated API execution into build pipeline.

Education

Master of Science in Information Technology, Bharathiar University (2013) | Coimbatore, India

Certificates

- Selenium Java - Test Leaf
- Playwright JavaScript certification in Udemy
